

Rocknel is a solely owned subsidiary of Meira Corporation, a leading Japanese fastener manufacturer for the automotive, aerospace and medical markets.

A world-class company, Rocknel is always looking to the future and is dedicated to consistent growth in both size and capabilities.

Experience Rocknel Value

See for yourself why Rocknel is the fastener supplier of preference for several auto manufacturers. Contact us today for a prompt quotation, or for assistance on an application challenge on your next fastener requirement.

How to find us

Rocknel Fastener, Inc.
VALUE THROUGH PERFORMANCE

Efficiency is Key to the Rocknel Success Story

Efficient operations in every aspect of our business model is key to what makes Rocknel Fastener the choice of those who specify fasteners in major automotive, tier and commercial markets. We provide deliveries with extremely high on-time rates and low PPMs at more competitive costs than other suppliers in the industry. Simply put, we offer superior value – through performance.

QUALITY

- ISO - 9001:2008 Certified
- State-of-the-art EDI System increases accuracy throughout the manufacturing process
- Unique work cell configuration reduces errors associated with material handling procedures
- In-house optical inspection and sorting equipment prevents non-conforming or mixed parts from getting to our customers.

DELIVERY

- Our floor plan and manufacturing system are designed for superior productivity
- Our production scheduling, inside sales and shipping department are dedicated to provide prompt, reliable JIT deliveries.

VALUE

- Rocknel associates work in an atmosphere that fosters teamwork and accountability, which means you get a fastener that performs as expected.
- Minimized inventory and material handling requirements keep our costs in check.
- The latest in manufacturing and tooling technology is employed at Rocknel assuring customers that their parts are made efficiently with minimum set-up.

Fasteners for Automotive

CLIENTS

- Honda

- Mitsubishi Motors of North America
- Automotive Tiers
- Commercial and Industrial

Fasteners for Automotive Components

Fasteners for Lawn and Garden

Applying technical expertise and financial resources to customer problems enables Rocknel to realistically seek long-term, win-win customer relationships.

Our Formax heading machine is the latest in cold forming technology which allows unique parts to be made in a multi-blow operation reducing the need for secondary turning or machining operations.

YOUR SINGLE SOURCE FOR STANDARD AND SPECIAL FASTENERS

Rocknel Size Range

Size	Length
M6 Bolt	10-150 mm
M6 & M8 Sems Washer Bolts	10-35 mm
M8-M14	16-150 mm

CAPABILITIES

- Cold Headed Fasteners
- Materials:
 - Carbon Steel
 - Alloy Steel

SECONDARY OPERATIONS

- CNC Machining to 0.0002" (.005mm) Tolerances
- Robotic Feed to CNC Machining Center
- Pointing and Shaving Operations

TECHNICAL SUPPORT

- Applications Engineering
- Prototypes and Samples
- Proposal Drawings
- CATIA V with 3D Modeling

SURFACE COATINGS AVAILABLE

- In-house Zinc Plating Line with Latest in Trivalent Top Coats
- Dip/Spin Coatings
- Special Lubricants
- Locking Agents

IN-HOUSE HEAT TREAT SYSTEM

- Heat Treat, Quench, and Tempering all completed on in-line furnaces
- Better deliveries due to reduced cycle time and real time quality control
- On staff metallurgist assures proper heat treat process
- Multiple furnaces for greater scheduling flexibility
